

REGENERATIVE AI READINESS & GOVERNANCE AUDIT

Introduction

Prepare Your Organization for the EU AI Act & Next-Generation AI Governance

The Regenerative AI Readiness & Governance Audit provides a comprehensive, structured assessment of your organization's AI systems, risks, and governance maturity. Built on the Regenerative Modeling Cycle (RMC™) and Cognitive Alignment Layer (CAL), the audit evaluates 29 critical dimensions required for safe, compliant, and future-aligned AI operations.

This audit is designed for organizations that want to move beyond checklists—towards adaptive, transparent, and resilient AI systems aligned with human goals and regulatory expectations.

Scope of the Audit

- EU AI Act compliance readiness
- AI governance & documentation review
- Data quality, integrity & traceability
- Model lifecycle assessment

- Risk, harm & impact analysis
- Explainability, oversight & accountability
- Decision pipeline mapping
- Cognitive Alignment Layer evaluation
- Sustainability & system resilience

What You Receive

1. Compliance & Governance Score

Clear scoring across 29 dimensions with gaps, risks, and priority actions.

2. Operational Readiness Blueprint

Detailed guidance on workflows, data structures, documentation, testing, and governance processes.

3. Strategic Leadership Recommendations

High-level insights for long-term transformation, capability building, and safe scaling of AI.

Methodology

The audit combines regulatory frameworks (EU AI Act, ISO 42001), enterprise governance standards, and regenerative system design.

It includes documentation review, interviews, diagnostic scoring, system mapping, and risk evaluation.

Timeline

5–10 business days depending on complexity.

Why Regenerative AI?

Regenerative AI strengthens organizational resilience by creating **closed-loop, self-improving decision systems** that remain aligned with human intent and regulatory requirements.

It ensures that AI is safe, adaptive, transparent, and continuously improving.

Who Is It For?

- Enterprises using or planning AI
- Regulated industries (finance, healthcare, manufacturing, energy)
- Technology & consulting companies
- Leadership teams responsible for governance and compliance
